GHIMA AND KOREA

## Central Press

Canton, July 22

The National Government is making a close study of the Wanpaoshan affair and the massacre of Chinese in Korea and will shortly issue a declaration on this matter.

Officials are compiling facts of the case which are somewhat obscured by propaganda from Shanghai and Nanking, according to Central Press.

There is some talk about starting a boycott against Japanese goods, but the whole affair is lukewarm. Most people blame the Koreans for the killing of the Chinese, and assuming they were flamed by the Japanese the Koreans should have their own judgment and decision.

"Chiang Kai-shek exploits this incident in order to unify the country against Japan, so that they will forget his usurpation of the power of the Kuomintang and the Covernment," declared an important Party official to a representative of the Central Press. Instead of protecting Chinese living abroad, Chiang took advantage of each incident and stirred up the people against a foreign power so as to make himself a patriot.

The official declared that what happened at Horsa is the same as Tsinon and Mancheli, when the the people forget its incompetency and maladministration.
